

Ioana Criclevit

Senior Data Analyst

London • 07759124932 • ioanapcriclevit@gmail.com • [LinkedIn](#)

Professional Summary

Senior data analyst with deep experience producing regulatory-grade analytical outputs, building trusted reporting infrastructure, and generating insights that shape policy outcomes for people in financial difficulty. At DWP, closed an eight-year measurement gap in Universal Credit health applications – producing the first reliable, publicly verified statistics on one of the UK's most vulnerable claimant groups. Strong technical foundation in SQL and SAS across large-scale production environments, with experience designing automated data quality controls, building data governance frameworks, and partnering with senior stakeholders to turn ambiguous requirements into decision-ready data. Currently building dbt, BigQuery SQL, Looker, and Python to extend into modern analytics stacks.

Key Skills

Data & Reporting: SQL (production ETL, joins, aggregations, deduplication) • SAS (expert) • R (ggplot2, plotly, R Markdown) • Excel (advanced)

Technical Skills: SAS • SQL • R • BigQuery • Python • Looker • Excel • Git

Regulatory & Governance: Data governance • Regulatory-grade statistical publication • Data quality frameworks • Automated validation controls • Official Statistics sign-off processes

Stakeholder Partnership: Product and policy stakeholder engagement • Requirements translation • Cross-functional analytical delivery • Junior analyst coaching and development

Professional Experience

Senior Data Analyst

DWP – London | Nov 2021 – Jan 2024

- Resolved an eight-year reporting gap on Universal Credit health applications – publishing the first verified statistics on financial health outcomes for a population of financially vulnerable claimants, subject to UK Statistics Authority scrutiny and director-level governance panels
- Designed and implemented production ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility, auditability, and analytical trust at scale
- Built spine data products by integrating multiple complex source datasets into unified analytical bases, enabling downstream analysis and automating previously manual reporting workflows
- Built data governance frameworks and automated validation controls across multiple large-scale sources, materially reducing inconsistencies and improving reliability of analytical outputs – directly analogous to ensuring trusted data underpins business operations
- Translated ambiguous business requirements into defined metrics and automated reporting solutions, improving access to timely, decision-ready performance data aligned with operational goals

- Led agile cross-functional delivery, managing priorities, risks, and timelines across concurrent analytical workstreams
- Developed intuitive data visualisations in R and Excel, prioritising usability for operational and policy decision-makers
- Managed and coached junior analysts, setting objectives, reviewing outputs, and building team capability

Head of Data Sharing and Identity Fraud Policy

Home Office – London | Jan 2024 – Mar 2026

- Shaped the fraud component of the UK's new mandatory digital ID system, embedding risk as a core design consideration and structuring complex analysis for public consultation
- Led strategic review of a national identity fraud database, quantifying prevention value and translating findings into a business case that secured £200k in funding
- Created and ran a cross-sector working group of 85+ organisations across banking, fintech, telecoms and law enforcement, surfacing barriers to economic crime data sharing and informing government policy
- Delivered the UK's first public consultation on economic crime data sharing, structuring ambiguous requirements into a defined analytical framework and evidence base
- Influenced two commitments in the UK's National Fraud Strategy through targeted analytical recommendations and structured performance reporting to senior officials

Data Analyst

DWP – London | Oct 2019 – Nov 2021

- Automated QA processes in SAS from scratch, reducing a week-long manual process to a single day
- Built intuitive data visualisations in R (ggplot2, plotly, R Markdown) for non-technical stakeholders
- Delivered concurrent data publication projects under tight deadlines, achieving 100% on-time delivery
- Extracted and manipulated data from operational relational databases using SAS, performing joins, filters, and aggregations to build analysis-ready datasets for statistical publication.
- Led a team of 4, managed and coached junior analysts

Data Analyst

DLUHC – London | Apr 2018 – Oct 2019

- Built and automated data processing pipelines in R, reducing manual effort by 66%
- Consolidated and analysed data from 317 sources to build a unified analytical dataset for national housing policy reporting
- Produced data summaries and stakeholder briefings translating complex outputs into actionable insights

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst (Coursera) • 2025

Basic Statistics, University of Amsterdam (Coursera) • 2025

GitHub Foundations (Part 1 of 2) – Microsoft • 2025

Published Work

- *Universal Credit Work Capability Assessment statistics* – DWP Official Statistics (regulatory-grade publication, UK Statistics Authority compliant)
- *ESA Work Capability Assessment statistics* – DWP Official Statistics
- *Economic Crime Information Sharing Call for Evidence* – UK Government, Home Office
