

Ioana Criclevit

Senior Data Analyst

London • 07759124932 • ioanapcriclevit@gmail.com • [LinkedIn](#)

Professional Summary

Data analyst with eight years of experience delivering high-volume operational reporting, investigating performance issues, and translating complex data into clear, actionable recommendations for senior commercial and operational stakeholders. Track record of building automated reporting products across large-scale, multi-source environments, identifying root causes in performance data, and working closely with operational teams to drive data-led decisions in fast-moving organisations. Brings strong SQL foundations, meticulous attention to data quality, and a proven ability to communicate analytical findings clearly across technical and non-technical audiences.

Key Skills

Technical: SQL · SAS · R (ggplot2, plotly, R Markdown) · Power BI · Excel · Git · ETL pipeline design · Large-scale data processing (800M+ records) · Automated QA frameworks · Code versioning.

Analysis: Operational and commercial performance analysis · Root cause investigation · SLA and delivery performance monitoring · Multi-source data consolidation · Discrepancy investigation and resolution · Translating ambiguous requirements into reporting frameworks.

Visualisation & Reporting: Dashboards and reporting packs in R and Power BI · High-volume recurring reports · Reporting for senior commercial and operational stakeholders.

Delivery & Collaboration: Senior stakeholder engagement · Cross-functional agile delivery · Concurrent workstream management · Data product lifecycle ownership · Coaching and mentoring junior analysts.

Professional Experience

Data Sharing and Identity Fraud Policy Lead

Home Office – London | Jan 2024 – Mar 2026

- Established and ran a cross-sector working group of 85+ organisations across banking, fintech, telecoms and law enforcement, synthesising diverse stakeholder input into structured, evidence-based recommendations for senior decision-makers.
- Produced executive briefings and policy papers translating complex, multi-source analysis into clear, actionable recommendations for technical and non-technical audiences.
- Secured £200k in funding by translating a strategic analytical review into a clear, evidence-led business case for senior decision-makers.

Senior Data Analyst

Department for Work and Pensions (DWP) – London | Nov 2021 – Jan 2024

- Investigated and resolved a complex, long-standing performance reporting gap – identifying root causes across multiple data sources, reconciling conflicting data, and delivering the first reliable operational statistics where none had existed for eight years.
- Built and owned operational performance dashboards and reporting packs in R and Power BI, enabling senior operational and commercial stakeholders to monitor performance and make timely, data-led decisions.
- Translated ambiguous business requirements into defined metrics and automated reporting solutions, reducing manual effort and improving the timeliness and reliability of performance data.
- Established automated data quality frameworks and validation rules across multiple large-scale sources, resolving inconsistencies and materially improving reliability of analytical outputs.
- Designed and implemented ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility and auditability.

- Managed and coached junior analysts, setting objectives and reviewing outputs to build capability and ensure consistently high-quality delivery.

Junior Data Analyst

Department for Work and Pensions (DWP) – London | Oct 2019 – Nov 2021

- Automated QA processes in SAS from scratch, reducing a week-long manual process to a single day, directly improving the accuracy and reliability of high-volume analytical outputs.
- Built interactive data visualisations in R (ggplot2, plotly) and R Markdown, translating complex statistical outputs into accessible, intuitive reports for non-technical audiences.
- Delivered recurring publication-ready data products under tight deadlines, achieving 100% on-time delivery across a complex, interdependent workload.
- Extracted and manipulated data from operational relational databases using SAS, performing joins, filters, and aggregations to build analysis-ready datasets.

Data Analyst

Department for Levelling Up, Housing & Communities – London | Apr 2018 – Oct 2019

- Consolidated and analysed data from 317 sources to build a unified analytical dataset supporting data-led operational performance reporting.
- Automated data processing in R and SQL, reducing manual effort by 66% and delivering more reliable, reusable performance metrics.
- Produced analytical reports and data summaries for senior stakeholders, translating complex multi-source outputs into clear, actionable insights.

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst: | Microsoft (Coursera) | 2025

Basic Statistics: | University of Amsterdam (Coursera) | 2025

GitHub Foundations (Part 1 of 2): | Microsoft | 2025
