Professional Summary

Senior data analyst with eight years of experience designing and delivering intuitive dashboards, translating complex datasets into clear narratives and actionable insights for operational teams and senior stakeholders in high-stakes environments. Proven track record of leading analytics initiatives end-to-end, from requirements discovery and data modelling to iterative delivery and user support. Experienced in managing senior stakeholder relationships across technical and non-technical audiences, facilitating requirements workshops, and coaching and advising analysts on visualisation best practices. Brings strong SQL and data engineering foundations alongside a track record of transforming fragmented operational data into governed, decision-ready reporting products.

Key Skills

Visualisation & Dashboards: Power BI · R (ggplot2, plotly, R Markdown) · User-centric dashboard design · Data visualisation and storytelling.

Data Engineering: SQL · SAS · ETL pipeline design · Large-scale data processing (800M+ records) · Data profiling, cleansing, and preparation · Automated Quality Assurance frameworks · Code versioning.

Analytics Delivery: End-to-end analytics initiatives · Operational performance analytics · Requirements translation · Iterative development · Stakeholder reporting.

Stakeholder & Team: Senior stakeholder management · Requirements workshops · Cross-functional delivery · Coaching and advising analysts.

Technical Skills: SQL · SAS · R · Power BI · Excel · Git.

Professional Experience

Data Sharing and Identity Fraud Policy Lead

Home Office – London | Jan 2024 – Mar 2026

- Produced executive briefings translating complex, multi-source analysis into clear narratives and actionable insights, consistently adapting communication style to technical and non-technical audiences at all levels.
- Managed senior stakeholder relationships across a cross-sector working group of 85+ organisations spanning banking, fintech, telecoms and law enforcement, facilitating requirements workshops and translating diverse needs into structured analytical frameworks.
- Delivered the UK's first public consultation on economic crime data sharing, leading analytics initiatives end-to-end from discovery through to publication.
- Secured £200k in funding by translating a strategic analytical review into a clear, evidence-led business case for senior decision-makers.

Department for Work and Pensions (DWP) – London | Nov 2021 – Jan 2024

- Designed and delivered intuitive operational performance dashboards and reports in R (ggplot2, plotly) and Power BI, translating complex datasets into clear narratives for operational and policy stakeholders.
- Translated ambiguous business requirements into governed reporting frameworks and automated solutions, improving access to timely, decision-ready operational performance data.
- Designed and implemented ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility and auditability.
- Performed data profiling, cleansing, and preparation across six large-scale data sources, establishing automated QA frameworks and validation rules that materially improved analytical reliability.
- Resolved an eight-year operational reporting gap by structuring an ill-defined problem, reconciling conflicting data sources, and publishing reliable statistics.
- Coached and advised junior analysts on data visualisation best practices and output standards, building team capability and improving insight quality.
- Produced clear documentation of analytical definitions, methodologies, assumptions, and decision logic to support reproducibility, auditability, and consistent interpretation of outputs.

Data Analyst

Department for Work and Pensions (DWP) – London | Oct 2019 – Nov 2021

- Built interactive data visualisations in R (ggplot2, plotly, R Markdown), translating complex statistical outputs into accessible, user-centric reports for non-technical audiences.
- Automated data profiling and QA processes in SAS from scratch, reducing a week-long manual process to a single day.
- Delivered concurrent analytical publication projects under tight deadlines, achieving 100% on-time delivery.
- Extracted and manipulated data from operational relational databases using SAS, performing joins, filters, and aggregations to build analysis-ready datasets for statistical publication.

Data Analyst

Department for Levelling Up, Housing & Communities – London | Apr 2018 – Oct 2019

- Consolidated and analysed data from 317 sources to build a unified analytical dataset, supporting data-led operational performance reporting for national housing policy.
- Automated data processing in R, reducing manual effort by 66% and delivering more reliable, reusable performance metrics.
- Produced analytical reports and data summaries for senior stakeholders, translating complex multi-source outputs into actionable insights.

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst: | Microsoft | 2025

Basic Statistics: | University of Amsterdam | 2025

GitHub Foundations (Part 1 of 2): | Microsoft | 2025
