

Ioana Criclevit

Senior Data Analyst

London • 07759124932 • ioanapcriclevit@gmail.com • [LinkedIn](#)

Professional Summary

Data analyst and operations specialist with eight years of experience improving analytical processes through automation, building cross-functional data products, and translating complex data into actionable commercial recommendations. Track record of identifying operational inefficiencies and delivering measurable improvements – including automating a week-long QA process to a single day. Comfortable managing complex stakeholder relationships across organisational boundaries, leveraging AI tools to drive analytical productivity, and owning multiple concurrent workstreams in fast-paced environments.

Key Skills

Technical: SQL · SAS · R · Excel · Git · ETL pipeline design · Process automation · Automated QA frameworks · AI-assisted workflow (Claude, Copilot) · Large-scale data processing.

Analysis: Translating ambiguous requirements into operational solutions · Business process optimisation · Data integrity and discrepancy resolution · Multi-source data consolidation · Statistical analysis.

Visualisation & Reporting: Interactive dashboards and reports in R · Power BI · Stakeholder-ready reporting for commercial and non-technical audiences.

Operations & Delivery: Cross-functional stakeholder management · Project management across concurrent workstreams · Sales and pipeline data analysis · Data product lifecycle ownership · Coaching and mentoring junior analysts.

Professional Experience

Data Sharing and Identity Fraud Policy Lead

Home Office – London | Jan 2024 – Mar 2026

- Created and ran a cross-sector working group of 85+ organisations across banking, fintech, telecoms and law enforcement – managing competing stakeholder priorities, driving alignment, and delivering structured, evidence-based recommendations to senior decision-makers.
- Delivered the UK's first public consultation on economic crime data sharing, translating complex cross-government requirements into clear analytical frameworks and accessible policy documentation.
- Secured £200k in funding by translating a strategic analytical review into a clear, evidence-led business case for senior decision-makers.
- Leveraged AI tools to streamline analysis and insight delivery, materially improving team productivity and output quality.

Senior Data Analyst

Department for Work and Pensions (DWP) – London | Nov 2021 – Jan 2024

- Translated ambiguous business requirements into defined metrics and automated reporting solutions, eliminating manual bottlenecks and improving access to timely, decision-ready performance data.
- Established automated data quality frameworks and validation rules across multiple large-scale sources, resolving inconsistencies and improving reliability of analytical outputs.
- Designed and implemented ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility and auditability.
- Led agile cross-functional delivery across concurrent analytical workstreams, managing priorities and timelines with operational and senior stakeholders.
- Developed intuitive data visualisations and analytical products in R and Excel, prioritising usability for operational and policy decision-makers.

- Managed and coached junior analysts, setting objectives and reviewing outputs to build capability and ensure high-quality delivery.

Junior Data Analyst

Department for Work and Pensions (DWP) – London | Oct 2019 – Nov 2021

- Automated QA processes in SAS from scratch, reducing a week-long manual process to a single day – identifying the bottleneck, scoping the solution, and delivering it independently.
- Built interactive data visualisations in R (ggplot2, plotly) and R Markdown, translating complex statistical outputs into accessible reports for non-technical audiences.
- Delivered recurring publication-ready data products under tight deadlines, achieving 100% on-time delivery across a complex, interdependent workload.
- Extracted and manipulated data from operational relational databases using SAS, performing joins, filters, and aggregations to build analysis-ready datasets.

Data Analyst

Department for Levelling Up, Housing & Communities – London | Apr 2018 – Oct 2019

- Consolidated and analysed data from 317 sources to build a unified analytical dataset supporting data-led reporting on national housing policy performance.
- Automated data processing in R and SQL, reducing manual effort by 66% and delivering more reliable, reusable performance metrics.
- Produced analytical reports and data summaries for senior stakeholders, translating complex multi-source outputs into clear, actionable insights.

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst: | Microsoft (Coursera) | 2025

Basic Statistics: | University of Amsterdam (Coursera) | 2025

GitHub Foundations (Part 1 of 2): | Microsoft | 2025
