

Ioana Criclevit

Senior Data Analyst

London • 07759124932 • ioanapcriclevit@gmail.com • [LinkedIn](#)

Professional Summary

Senior data analyst with a strong track record in operational MI transformation, reporting framework design, and performance analytics at scale. At DWP, led the overhaul of fragmented, unreliable reporting infrastructure across large-scale operational programmes – closing measurement gaps, establishing governed metric structures, and delivering decision-ready performance data to operational and policy stakeholders. Experienced in partnering closely with operational leadership to translate ambiguous business needs into scalable, well-structured analytical solutions. Brings both the technical depth to build robust MI reporting systems and the stakeholder credibility to drive adoption – experience directly applicable to lending operations analytics.

Key Skills

Operational Analytics & MI: Operational performance analytics • MI reporting frameworks • Metric design and governance • Reporting gap resolution • Automated MI pipelines • Data quality and validation

Data Engineering: SAS (expert) • SQL (production ETL, joins, aggregations, deduplication) • R (ggplot2, plotly, R Markdown) • Excel (advanced)

Technical Skills: SAS • SQL • R • Python • Looker • Power BI • Excel • Git

Stakeholder Partnership: Operational and senior leadership engagement • Requirements translation • Cross-functional delivery • Junior analyst management and coaching

Professional Experience

Senior Data Analyst

DWP – London | Nov 2021 – Jan 2024

- Designed and implemented production ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility, auditability, and analytical trust at scale
- Built spine data products by integrating multiple complex source datasets into unified analytical bases, enabling downstream analysis and automating previously manual reporting workflows
- Resolved an eight-year MI reporting gap by structuring an ill-defined problem, reconciling conflicting data sources, and publishing the first reliable statistics on Universal Credit health applications – demonstrating the ability to assess broken MI frameworks and deliver step-change improvements
- Established automated data quality frameworks and validation rules across multiple large-scale sources, materially reducing inconsistencies and improving reliability of analytical outputs
- Translated ambiguous operational requirements into governed MI reporting frameworks and automated solutions, improving access to timely, decision-ready performance data aligned with operational goals
- Led agile cross-functional delivery, managing priorities, risks, and timelines across concurrent analytical workstreams
- Developed intuitive data visualisations in R and Excel, prioritising usability for operational and policy decision-makers

- Managed and coached junior analysts, setting objectives, reviewing outputs, and building team capability
- Produced clear documentation of analytical definitions, methodologies, assumptions, and decision logic to support reproducibility, auditability, and consistent interpretation of outputs

Data Analyst

DWP – London | Oct 2019 – Nov 2021

- Automated QA processes in SAS from scratch, reducing a week-long manual process to a single day
- Built intuitive data visualisations in R (ggplot2, plotly, R Markdown) for non-technical stakeholders
- Delivered concurrent data publication projects under tight deadlines, achieving 100% on-time delivery
- Led a team of 4, managed and coached junior analysts

Head of Data Sharing and Identity Fraud Policy

Home Office – London | Jan 2024 – Mar 2026

- Led strategic analytical review of a national identity fraud database, structuring complex findings into a decision-ready business case that secured £200k in funding – applying the same evidence-led investment case skills applicable to Collections operational decisions
- Created and ran a cross-sector working group of 85+ organisations, partnering with senior stakeholders across banking, fintech, telecoms and law enforcement to surface operational barriers and shape government policy
- Delivered the UK's first public consultation on economic crime data sharing, translating ambiguous cross-government requirements into a defined analytical framework
- Authored executive briefings and policy documents translating complex analysis into actionable recommendations for senior decision-makers

Data Analyst

DLUHC – London | Apr 2018 – Oct 2019

- Built and automated data processing pipelines in R, reducing manual effort by 66%
- Consolidated and analysed data from 317 sources to build a unified analytical dataset for national housing policy reporting
- Produced data summaries and stakeholder briefings translating complex outputs into actionable insights

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst (Coursera) • 2025

Basic Statistics, University of Amsterdam (Coursera) • 2025

GitHub Foundations (Part 1 of 2) – Microsoft • 2025
