Professional Summary

Senior data and analytics leader with eight years of experience delivering scalable analytical pipelines, automated data products, and strategic insight in high-stakes, high-volume environments. Designed and owned production ETL pipelines processing 800M+ records, built spine data products integrating multiple complex sources, and led cross-functional analytical delivery at enterprise scale. Trusted partner to director and executive-level stakeholders, with a proven track record of structuring ambiguous problems, influencing national strategy, and developing analyst capability across teams. Currently transitioning from a government data stack (SAS, R) to modern commercial tooling, bringing rigorous production data engineering discipline to a SQL-first environment.

Key Skills

Data Engineering & Infrastructure: ETL pipeline design and delivery · Large-scale data processing (800M+ records) · SAS · SQL · Spine data product architecture · Automated QA and data quality frameworks · Code versioning · Reproducible analytics

Analytics & Delivery: Statistical analysis · Problem structuring and ambiguity resolution · Data product lifecycle ownership · Agile delivery · Cross-functional team leadership

Leadership & Influence: Executive and director-level stakeholder management · Strategic recommendations and performance reporting · Analyst mentoring and capability development · Cross-sector collaboration (85+ organisations)

Technical Skills: SAS · SQL · R · Python · Excel · Git

Professional Experience

Head of Data Sharing and Identity Fraud Policy

Home Office – London | Jan 2024 – Mar 2026

- Shaped national fraud data sharing policy strategy by synthesising evidence from 85+ organisations across banking, fintech, telecoms and law enforcement, translating complex cross-sector insights into structured recommendations for executive decision-makers.
- Secured £200k in funding by leading a strategic review of a national identity fraud database, translating complex analytical findings into a decision-ready business case for senior stakeholders.
- Delivered the UK's first public consultation on economic crime data sharing.
- Influenced two commitments in the UK's National Fraud Strategy through targeted data driven recommendations and sustained engagement with senior officials.

Senior Data Analyst

Department for Work and Pensions (DWP) – London | Nov 2021 – Jan 2024

- Designed and implemented production ETL pipelines in SAS and SQL, processing 800M+ records with disciplined code versioning to ensure reproducibility, auditability, and analytical trust at scale.

- Built spine data products by integrating multiple complex source datasets into unified analytical bases, enabling downstream analysis and automating manual reporting workflows.
- Resolved an eight-year reporting gap by structuring an ill-defined problem, reconciling conflicting data sources, and publishing the first reliable statistics on Universal Credit health applications.
- Established automated data quality frameworks and validation rules across multiple large-scale sources, materially reducing inconsistencies and improving reliability of analytical outputs.
- Led agile cross-functional delivery, managing priorities, risks, and timelines across concurrent analytical workstreams to achieve consistent on-time delivery.
- Managed and coached junior analysts, setting objectives, reviewing outputs, and building team capability and improving both the quality and independence of analytical delivery.

Data Analyst

Department for Work and Pensions (DWP) – London | Oct 2019 – Nov 2021

- Automated Quality Assurance processes in SAS from scratch, reducing a week-long manual process to a single day and significantly improving the accuracy and reliability of analytical outputs.
- Built intuitive data visualisations in R (ggplot2, plotly, R Markdown), translating complex statistical outputs into accessible reports for non-technical stakeholders.
- Delivered concurrent data publication projects under tight deadlines, achieving 100% on-time delivery across a complex, interdependent workload.

Data Analyst

Department for Levelling Up, Housing & Communities – London | Apr 2018 – Oct 2019

- Automated data processing pipelines in R, reducing manual effort by 66% and delivering more reliable, reusable analytical outputs aligned to strategic targets.
- Consolidated and analysed data from 317 sources to build a unified analytical dataset supporting data-led reporting on national housing policy.

Education

MSc Social Statistics, Research Methods — Distinction: | University of Southampton

BSc Criminology — First Class Honours: | University of Southampton

Professional Development

Microsoft Power BI Data Analyst: | Microsoft | 2025

Basic Statistics: | University of Amsterdam | 2025

GitHub Foundations (Part 1 of 2): | Microsoft | 2025
